Portfolio

We are going to design and build a portfolio website from scratch using HTML, CSS, and JavaScript. A portfolio website is a website that represents you online on web pages

Kelvin mwaniki

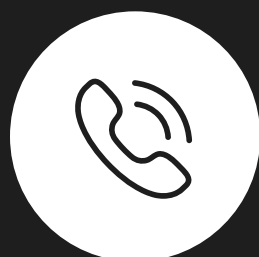

mwanikikelvin2030@gmail.com

. It contains different sections like Introduction to Yourself, About You, Your Services, Your Contact Details, and Your Portfolio. We are going to build all of the sections with an interactive and attractive web design that attracts more visitors using HTML, CSS, and JavaScript.

**The below defined steps can be
utilised to build and design a
portfolio website:**

In the first step, we will create a folder with the project name and create the HTML, CSS, JavaScript files, Images folder and a separate file for the responsive CSS if required.
